# Meixin Zhu

College of Transportation Engineering, Tongji University, 4800 Cao'an Road, Shanghai, 201804, China
E-mail: meixinzhu@tongji.edu.cn • https://meixinzhu.github.io/

**INTERESTS**

Autonomous Driving, Artificial Intelligence, Big Data Analytics, Driving behavior, Traffic-Flow Modeling and Simulation.

**EDUCATION**

**Tongji University**, Shanghai, China

- MEng in Communication and Transportation Engineering — Sep 2015 – Present
  - Thesis: Car-Following Behavior Modeling and Its Application in Intelligent Driving
  - Focus: Autonomous driving, reinforcement learning, car-following behavior, and naturalistic driving study.
  - Cumulative GPA: 91.2 / 100; Integrated Ranking: 1 / 237
  - Core Courses: Machine Learning, Fundamentals of Software Techniques, Transport Data Analysis, Fundamental of Traffic Flow Theory and Micro Simulation Analysis, Traffic Safety Analysis and Experiment.
  - Online Courses: Deep Reinforcement Learning (Berkeley EECS), Deep Learning for Self-Driving Cars (MIT EECS).
- BEng in Traffic Engineering — Sep 2011 – Jun 2015
  - Thesis: Evaluating Advanced Driving Assistance System Based on Naturalistic Driving Data
  - Cumulative GPA: 91.62 / 100; Integrated Ranking: 1 / 205
  - Math Courses: Advanced Mathematics, Linear Algebra, Probability and Mathematical Statistics, Operation Research, Numerical Methods and Computer Algorithms, An Introduction to Matlab and Its Application in Engineering.
  - Physics Courses: General Physics, Theoretical Mechanics, Structural Mechanics, Mechanics of Materials.
  - Computer Courses: C/C++ Programming, Database Technology and Applications, Fundamentals of Computers, Mobile Computing Introduction, Operating System (audit), Computer Vision (audit).
  - Professional Courses: Statistical Analysis in Transportation Engineering, Theory of Transportation System, Traffic Information Engineering, Traffic Management and Control, Traffic Safety Engineering, Transportation Planning.

**Udacity**, Mountain View, US

- Self-Driving Car Engineer Nanodegree — Oct 2016 – Oct 2017
  - Core Courses: Deep Learning, Computer Vision, Sensor Fusion, Localization, Control, Path Planning, Semantic Segmentation, Functional Safety, System Integration.
  - Capstone Project: Programming a Real Self-Driving Car. Include Traffic Light Detection, Control, and Waypoint Following.

**RESEARCH EXPERIENCE**

**Shanghai Naturalistic Driving Study Data Analyses** — Apr 2015 – Present

- General Motors, Active Safety Advance Development Department
  - Collected 60 Chinese drivers' real-world driving data, with a total mileage of 161,055 km.
  - Investigated decision-making mechanisms for essential driving behaviors based on 108,933 car-following events, 17,309 lane-change events, 7,845 cut-in events, and 3,256 vehicle-pedestrian conflicts.
  - Calibrated, validated, and cross-compared five representative car-following models and found that the full velocity difference model performed best for Shanghai drivers.
  - Investigated the impact of a forward collision warning system on drivers' car following behavior.
  - Developed two autonomous car-following algorithms with deep reinforcement learning: one can perform human-like car following; the other is capable of controlling vehicle velocity in a safe, efficient, and comfortable manner.

**Optimized Design for Combined Road Alignment** — Sep 2014 – Present

- Chinese National Science Foundation with Grant No. 51522810.
  - Evaluating the safety performance of combined horizontal and vertical alignments in mountainous freeways, to guide the design of safer mountainous freeways.
  - Replicated the full range of combined alignments used on a mountainous freeway in China using Tongji University driving simulator.
  - Investigated the effects of combined alignment on lateral acceleration, lane offset, and speed variation.

**Driving Behavior Research for Intelligent Collision Avoidance Technology** — Dec 2011 – Dec 2015

- China First Automobile Work (FAW) Corporation
  - Examined the effects of situational urgency on drivers' collision avoidance behaviors using Tongji University's eight-degree-of-freedom driving simulator.
  - Developed a kinematic-based forward collision warning (FCW) algorithm that is compatible with drivers' risk perceptions and behavioral responses.
  - Implemented the proposed FCW algorithm in Tongji University driving simulator, and evaluated the system's performance, warning timing, and safety benefits.

## PUBLICATIONS

### Journal Articles Under Review

[1] **M. Zhu**, X. Wang, A. Tarko, and S. Fang, "Modeling car-following behavior on urban freeways in Shanghai: a naturalistic driving study," *Transportation Research Part C: Emerging Technologies*, acceptance contingent on minor revision, Mar 2018.

[2] **M. Zhu**, X. Wang, and Y. Wang, "Human-like autonomous car-following planning by deep reinforcement learning," *Transportation Research Part C: Emerging Technologies*, acceptance contingent on major revision, Mar 2018.

[3] **M. Zhu**, and X. Wang, "Reinforcement learning based velocity control for autonomous driving with multi-objectives: safety, efficiency, and comfort," *Computer-Aided Civil and Infrastructure Engineering*, submitted, under the first round review, Oct 2017.

[4] **M. Zhu**, and X. Wang, "Impact on car following behavior of a forward collision warning system with headway monitoring," *Transportation Research Part C: Emerging Technologies*, submitted, under the first round review, Oct 2017.

### Journal Articles Published

[3] R. Yu, H. Lin, and **M. Zhu**, "Reinforcement learning based velocity control for autonomous driving with multi-objectives: safety, efficiency, and comfort," *Presentation at the 97th Annual Meeting of the Transportation Research Board*, Washington D.C., USA, Jan 2018.

[4] **M. Zhu**, X. Wang, and Y. Wang, "Human-like autonomous car-following model by deep deterministic policy gradient reinforcement learning," *Accepted for Oral Presentation at the ASCE International Conference on Transportation and Development*, Pittsburgh, Pennsylvania, Jul 2018.

[5] **M. Zhu**, X. Wang, and A. Tarko, "Calibrating car-following models on urban expressways for Chinese drivers using naturalistic driving data," *Oral Presentation at the 96th Annual Meeting of the Transportation Research Board*, Washington D.C., USA, Jan 2017.

[6] **M. Zhu**, and X. Wang, "Impact of a forward collision warning system on headway and reaction time during car following," in *Proceedings of the 14th World Conference on Transport Research*, Shanghai, China, Jul 2016.

[7] **M. Zhu**, X.S. Wang, and X.M. Wang, "Car-following headways in different driving situations: a naturalistic driving study," in *Proceedings of the 16th COTA International Conference of Transportation Professionals*, Shanghai, China, Jul 2016.

[8] X. Wang, and **M. Zhu**, "Car-following headways in different driving situations: a naturalistic driving study in China," in *Proceedings of the 5th International Symposium on Naturalistic Driving Research*, Blacksburg, Virginia, USA, Oct 2016.

**Patents**

[1] X. Wang, **M. Zhu**, and M. Chen, "A forward collision warning algorithm considering heterogeneity of drivers' reaction," *C.N. Patent 105691391 A*, filed Jun 2016, and issued Sep 2017.

**AWARDS & SCHOLARSHIPS**

- National Graduate Scholarship (twice), Ministry of Education, China — Oct 2017, Oct 2016
  Top 0.2%, for outstanding graduate students in China.
- Outstanding Student Award, Tongji University — Oct 2016
  One of 44 awardees from the 13,864 graduate students in Tongji.
- China Post-Graduate Mathematical Contest in Modeling, Second Prize — Sep 2016
- "Inspirational Star," Tongji University — Jun 2015
  One of 10 awardees from Tongji University.
- Volvo Group Scholarship, Volvo Group — Dec 2014
  One of 15 awardees in China, for outstanding engineering students.
- National Competition of Transport Science and Technology for Students, Second Prize — May 2014
  One of 8 winning groups in China.
  Project: Traffic Parameter Analysis Platform based on Unmanned Aerial Vehicle (UAV).
- Mathematical Contest in Modeling, Honorable Mention — Jan 2014
  Paper: Modeling the Keep-Right-Except-To-Pass Rule Using Cellular Automaton
- National Endeavor Fellowship (twice), Ministry of Education, China — Nov 2013, Nov 2012
  Top 3% of all the undergraduate students in China.
- China Undergraduate Mathematical Contest in Modeling, Second Prize — Sep 2013
  Top 5% among over 30,000 competition teams in China.

**VOLUNTEER & TEACHING**

**The 5th International Symposium on Transportation Safety**, Tongji University, China — Sep 2017

- Picked up 13 international symposium attendees at the airport.
- Prepared the invitation letters, and was in charge of the symposium registration.

**Transportation Safety Discipline "111 Project" Base**, Tongji University, China — Sep 2016

- Translated resumes for 21 invited international experts and prepared the presentation files.

**Statistical Analysis in Transportation Engineering**, Teaching Assistant, Tongji University — Fall 2017

- Preparing course slides and tutoring students on SAS coding.

**WORK EXPERIENCE**

**Cloud Base Information Corporation**, Shanghai, China

- Intern, Department of Data Science — Sep 2014 – Nov 2014
  - Project: Traffic State Estimation Based on Mobile Phone Signaling Data.
  - Real-time estimation of traveling speed, traveling time and traffic congestion state.

**PROFESSIONAL ACTIVITIES**

**Accident Analysis & Prevention**, Elsevier

- Reviewer — 2017

**REFERENCES**

- **Professor Xuesong Wang**, Advisor
  College of Transportation Engineering, Tongji University
- **Professor Yinhai Wang**, Research Advisor
  Department of Civil and Environmental Engineering, University of Washington
- **Professor Andrew P. Tarko**, Research Advisor
  Lyles School of Civil Engineering, Purdue University

**SKILLS**

Python, Julia, MATLAB, TensorFlow, Theano, C, C++, Java, R, SAS, SQL Server.
