

Meixin Zhu

College of Transportation Engineering, Tongji University, 4800 Cao'an Road, Shanghai, 201804, China
meixinzhu@tongji.edu.cn • <https://meixinzhu.github.io/>

RESEARCH INTERESTS

Autonomous Driving, Reinforcement Learning, Big Data Analytics, Driving behavior, Traffic-Flow Modeling and Simulation.

EDUCATION

Tongji University, Shanghai, China

- **MEng in Communication and Transportation Engineering** Sep 2015 – Present
 - Thesis: Car-Following Behavior Modeling and Its Application in Intelligent Driving
 - Adviser: Prof. Xuesong Wang
 - Focus: Autonomous driving, reinforcement learning, car-following behavior, and naturalistic driving study.
 - Cumulative GPA: 92 / 100; Integrated Ranking: 1 / 237
 - Core Courses: Machine Learning, Fundamentals of Software Techniques, Transport Data Analysis, Fundamental of Traffic Flow Theory and Micro Simulation Analysis, Traffic Safety Analysis and Experiment.
- **BSc in Traffic Engineering** Sep 2011 – Jun 2015
 - Thesis: Evaluating Advanced Driving Assistance System Based on Naturalistic Driving Data
 - Cumulative GPA: 92 / 100; Integrated Ranking: 1 / 205
 - Math Courses: Advanced Mathematics, Linear Algebra, Probability and Mathematical Statistics, Operation Research, Numerical Methods and Computer Algorithms.
 - Physics Courses: General Physics, Theoretical Mechanics, Structural Mechanics, Mechanics of Materials.
 - Computer Courses: C/C++ Programming, Database Technology and Applications, Fundamentals of Computers, Mobile Computing Introduction, An Introduction to Matlab and Its Application in Engineering.
 - Professional Courses: Statistical Analysis in Transportation Engineering, Theory of Transportation System, Traffic Information Engineering, Traffic Management and Control, Traffic Safety Engineering, Transportation Planning.

Udacity, Mountain View, US

- **Self-Driving Car Engineer Nanodegree** Oct 2016 – Oct 2017
 - Core Courses: Deep Learning, Computer Vision, Sensor Fusion, Localisation, Control, Path Planning, Semantic Segmentation, Functional Safety, System Integration.
 - Capstone Project: Programming a Real Self-Driving Car. Including Traffic Light Detection, Control, and Waypoint Following.

RESEARCH EXPERIENCE

Shanghai Naturalistic Driving Study Data Analyses

Apr 2015 – Present

- **General Motors, Active Safety Advance Development Department**
 - Collected 60 Chinese drivers' real-world driving data, with a total mileage of 161,055 km.
 - Extracted 108,933 car-following events, 17,309 lane-change events, 7,845 cut-in events, and 3,256 vehicle-pedestrian conflicts.
 - Calibrated, validated, and cross-compared five representative car-following models and found that the full velocity difference model performed best for Shanghai drivers.
 - Investigated the impact of a forward collision warning system on drivers' car following behavior.
 - Developed a human-like autonomous car-following algorithm using deep reinforcement learning, which outperformed traditional models.

Optimized Design for Combined Road Alignment

Sep 2014 – Present

- **Chinese National Science Foundation with Grant No. 51522810.**
 - Evaluating the safety performance of combined horizontal and vertical alignments in mountainous freeways, to guide the design of safer mountainous freeways.
 - Replicated the full range of combined alignments used on a mountainous freeway in China using Tongji University driving simulator.
 - Investigated the effects of combined alignment on lateral acceleration, lane offset, and speed variation.

Driving Behavior Research for Intelligent Collision Avoidance Technology

Dec 2011 – Dec 2015

- **China First Automobile Work (FAW) Corporation**
 - Examined the effects of situational urgency on drivers' collision avoidance behaviors using Tongji University's eight-degree-of-freedom driving simulator.
 - Developed a kinematic-based forward collision warning (FCW) algorithm that is compatible with drivers' risk perceptions and behavioral responses.
 - Implemented the proposed FCW algorithm in Tongji University driving simulator, and evaluated the system's performance, warning timing, and safety benefits.

Journal Articles Under Review

- [1] **M. Zhu**, and X. Wang, “Reinforcement learning based velocity control for autonomous driving with multi-objectives: safety, efficiency, and comfort,” *Computer-Aided Civil and Infrastructure Engineering*, submitted, under the first round review, Oct 2017.
- [2] **M. Zhu**, X. Wang, and Y. Wang, “Human-like autonomous car-following planning by deep reinforcement learning,” *Transportation Research Part C: Emerging Technologies*, submitted, under the first round review, Oct 2017.
- [3] **M. Zhu**, and X. Wang, “Impact on car following behavior of a forward collision warning system with headway monitoring,” *Transportation Research Part C: Emerging Technologies*, submitted, under the first round review, Oct 2017.
- [4] **M. Zhu**, X. Wang, A. Tarko, and S. Fang, “Modeling car-following behavior on urban freeways in Shanghai: a naturalistic driving study,” *Transportation Research Part C: Emerging Technologies*, submitted, under the second round review, Sep 2017.

Journal Articles Published

Patents

- [1] X. Wang, **M. Zhu**, and M. Chen, “A forward collision warning algorithm considering heterogeneity of drivers’ reaction,” *C.N. Patent 105691391 A*, filed Jun 2016, and issued Sep 2017.

AWARDS & SCHOLARSHIPS

- National Graduate Scholarship (twice), Ministry of Education, China Oct 2017, Oct 2016
Top 0.2%, for outstanding graduate students in China.
- Outstanding Student Award, Tongji University Oct 2016
One of 44 awardees from the 13,864 graduate students in Tongji.
- China Post-Graduate Mathematical Contest in Modeling, Second Prize Sep 2016
Top 20% of over 8,000 competition teams in China.
- ”Inspirational Star,” Tongji University Jun 2015
One of 10 awardees from Tongji University.
- Volvo Group Scholarship, Volvo Group Dec 2014
One of 15 awardees in China, for outstanding engineering students.
- National Competition of Transport Science and Technology for Students, Second Prize May 2014
One of 8 winning groups in China.
Project: Traffic Parameter Analysis Platform based on Unmanned Aerial Vehicle (UAV).
- Mathematical Contest in Modeling, Honorable Mention Jan 2014
Paper: Modeling the Keep-Right-Except-To-Pass Rule Using Cellular Automaton
- National Endeavor Fellowship (twice), Ministry of Education, China Nov 2013, Nov 2012
Top 3% of all the undergraduate students in China.
- China Undergraduate Mathematical Contest in Modeling, Second Prize Sep 2013
Top 5% among over 30,000 competition teams in China.

VOLUNTEER EXPERIENCE

- The 5th International Symposium on Transportation Safety**, Tongji University, China Sep 2017
- Picked up 13 international symposium attendees at the airport.
 - Prepared the invitation letters, and was in charge of the symposium registration.
- Transportation Safety Discipline “111 Project” Base**, Tongji University, China Sep 2016
- Translated resumes for 21 invited international experts.
 - Prepared the presentation file for the application of “111 Project” base.

WORK EXPERIENCE

- Cloud Base Information Corporation**, Shanghai, China
- Intern, Department of Data Science Sep 2014 – Nov 2014
 - Project: Traffic State Estimation Based on Mobile Phone Signaling Data.
 - Real-time estimation of traveling speed, traveling time and traffic congestion state.

AUDIT COURSES

- Deep Reinforcement Learning Spring 2017
Department of Electrical Engineering and Computer Science, UC Berkeley.
- Deep Learning for Self-Driving Cars Spring 2017
Department of Electrical Engineering and Computer Science, MIT.
- Operating System Fall 2014
School of Software Engineering, Tongji University.
- Computer Vision Spring 2014
School of Software Engineering, Tongji University.

STANDARD TESTS

- TOEFL: 105 (Reading 30, Listening 28, Speaking 20, Writing 27) Oct 2017
- GRE 325 (Verbal 158, 80%, Quantitative, 167, 92%) Analytical Writing 3.5, 42% Jun 2017

SKILLS

Python, MATLAB, TensorFlow, Theano, C, C++, Java, R, SAS, SQL Server.
